EmGenisys, Inc, an early-stage, animal ag tech company developing and marketing a SaaS platform to evaluate bovine embryo health, is seeking a Veteransary Technician to serve as a Research Associate to collaborate with veterinarians, dairy producers, breed associations and the Company. This person will build and foster relationships with members in the agricultural community, perform laboratory analysis of bovine embryos, collect data, and test EmGenisys products. The position will be based in the Central, Southern Tier or Finger Lakes region of New York, USA.

Priorities can often change in the fast-paced start-up environment, so this role includes, but is not limited to, the following responsibilities.

- Support the EmGenisys Mobile Lab in upstate New York
- Assist veterinarians, ET practitioners and livestock embryologists to collect and evaluate data
- Test product and maintain records for data entry
- Develop and maintain peer-to-peer collaborations and relationships with veterinarians, producers, and reproductive specialists
- Collaborate with veterinarians and livestock embryologists to collect data, develop best practices, and understand specific needs of the livestock industry
- Support and train research associates, interns, and students

Education and Experience
- High School Diploma
- Experience working in a laboratory environment, veterinary clinic or microscopy laboratory

Location / Travel
- The position is field based in upstate New York
- Approximately 60% travel required

To apply, send cv and cover letter to cara@emgenisys.com
