

Job Title: Integrated Circuit Engineering Manager

Join the company that is putting “the eye” in AI. Oculi®, Latin word for eyes, is a deep-tech fabless semiconductor company that produces the OCULI SPU™, the first practical silicon chip that closely mimics biology in selectivity, parallel processing and efficiency but outperforms in speed. Join the thought leaders in the field and play a critical role in delivering fast, efficient, secure, and low SWaP computer/machine vision solutions to the market.

About The Role

Oculi is looking for a strong experienced individual with good technical fundamentals and leadership skills to lead its chip design team. This position is responsible for managing an engineering team across multiple global locations, acting as the primary focal point for the technical team with Oculi’s leadership and customers/partners, managing schedule, budget, and manpower for projects, hiring and mentoring of employees, preparing technical and commercial reports and materials.

Key Qualifications

- 5+ years of chip design management experience with a proven track record of managing all aspects of a successful chip product throughout its lifecycle.
- 5+ years of analog, mixed signal, and/or digital circuit designs.
- Experience with EDA tools, Synopsys is a plus.
- Experience with imaging sensors and technology is a plus.
- Able to drive decision making across multiple partners/companies and within a high degree of ambiguity.
- Relentless focus on understanding, prioritizing, and solving industry needs.
- Ability to influence and be an effective leader and mentor of a multinational cross-functional team.
- Self-motivated and proactive, able to try new approaches and creatively solve problems.
- Excellent written, verbal communication and presentation skills in English.

Why should you apply to Oculi ?

- ✔ You get to work on the most advanced vision technology in the world.
- ✔ You get to work in a very dynamic and exciting startup where you set your own limit of success and growth.
- ✔ You get to collaborate with leaders and experts in the field of smart sensors and computer vision.
- ✔ You get to shape the next revolution in technology.
